PROFILE

I graduated from the Digital Game Design department of the Faculty of Communication at Istanbul Bilgi University. I am currently pursuing an MBA at Yıldız Technical University. During my university years, I gained experience with Unreal Engine for visual coding and Unity for C#. Throughout my studies, I used Blender 3D and Adobe programs for my 3D and 2D designs. I also used these programs for UI and UX designs. After graduation, I continued to improve myself with graphic and video work, along with Java and software testing courses.
