Trulioo

Implementation session - Londonist

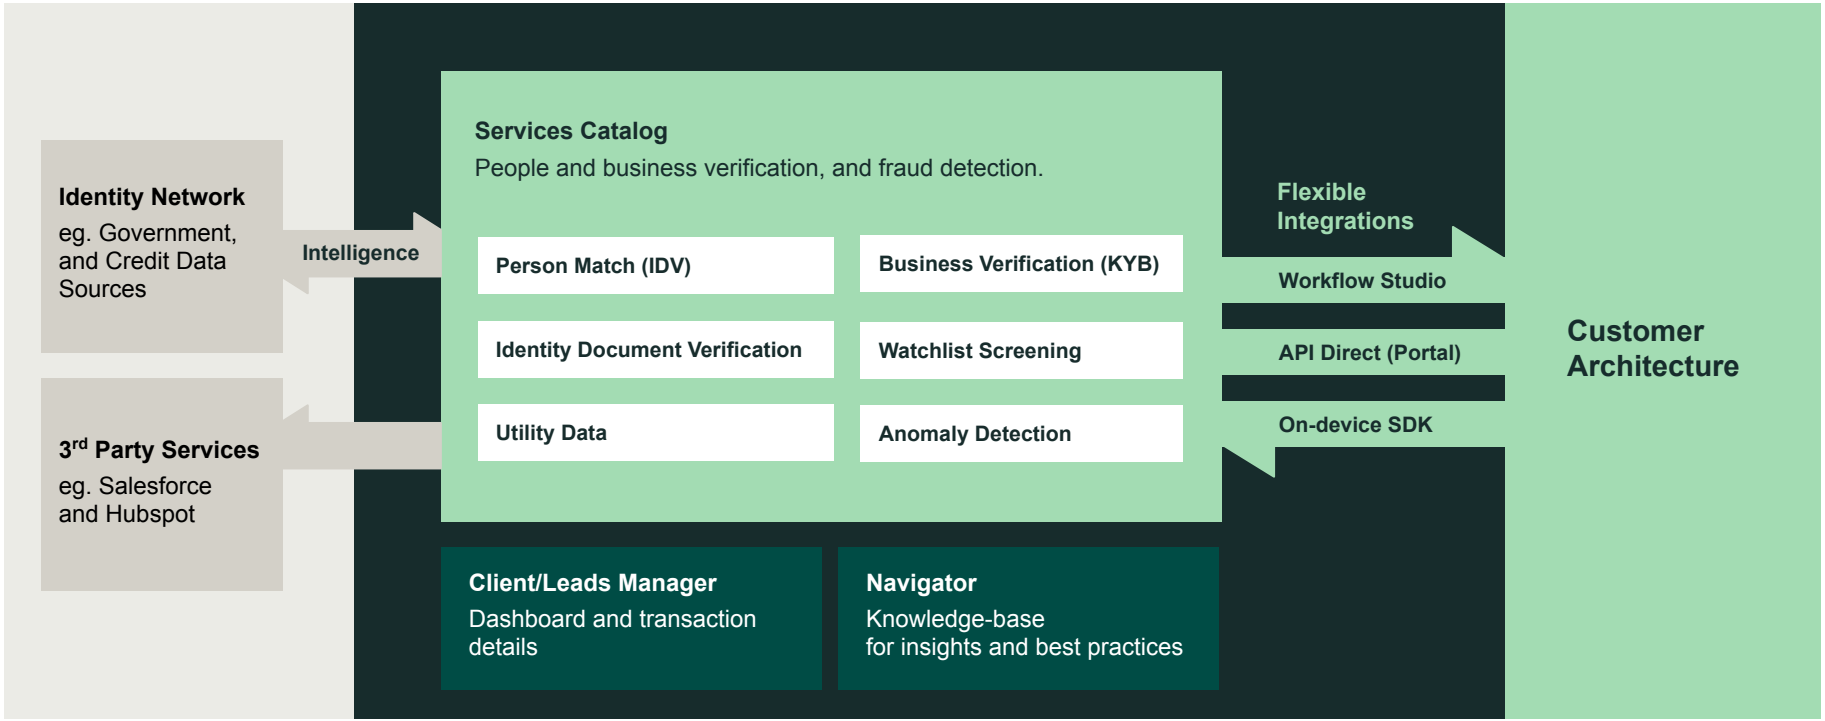

Agenda

- Trulioo Workflow Studio platform overview
- Workflow examples
- Launch options
- Live demo
- Next steps

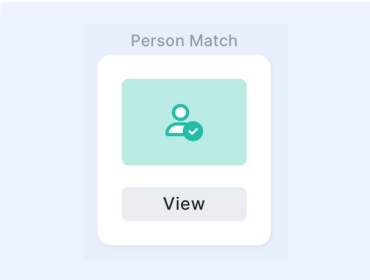

The Trulioo Platform

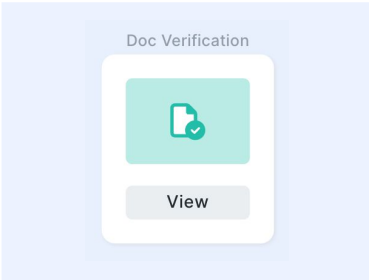

- Minimal engineering resources required for implementation
- Efficient administration with a single contract
- Easily connect and combine additional services as required

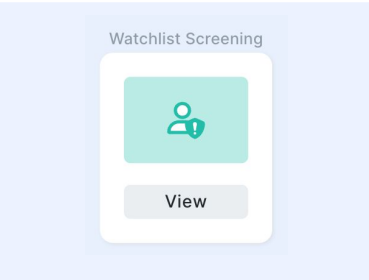

Workflow Studio: Individual Verification

- Leading global match rates
- Fastest verification speeds
- 70+ countries
- More than 400 data sources

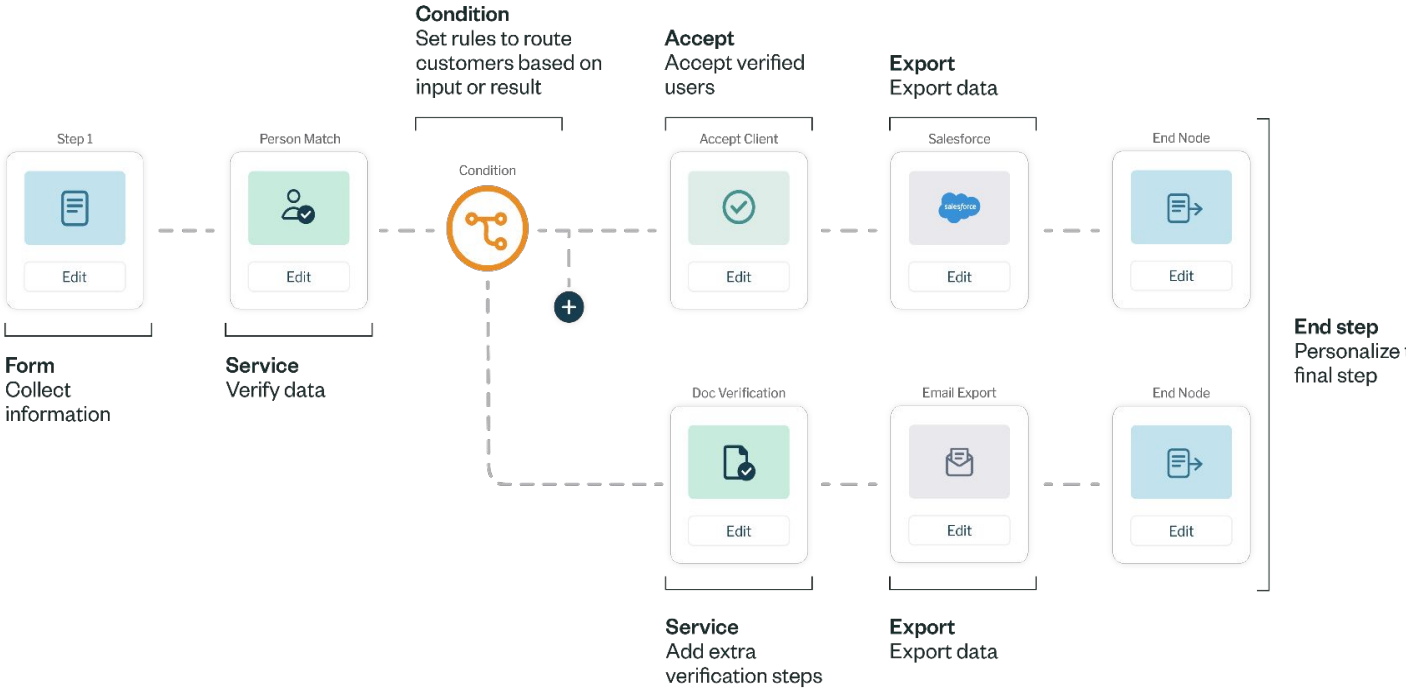

- Fast document authentication
- Verify 11,000 different types of identity documents in over 195 countries.
- Use selfies for authentication

- Monitor against 6,000+ global watchlists
- 20,000+ Adverse Media lists
- Ongoing monitoring
- Reduces false positives by upwards of 50%

Workflow Studio: A better way to verify

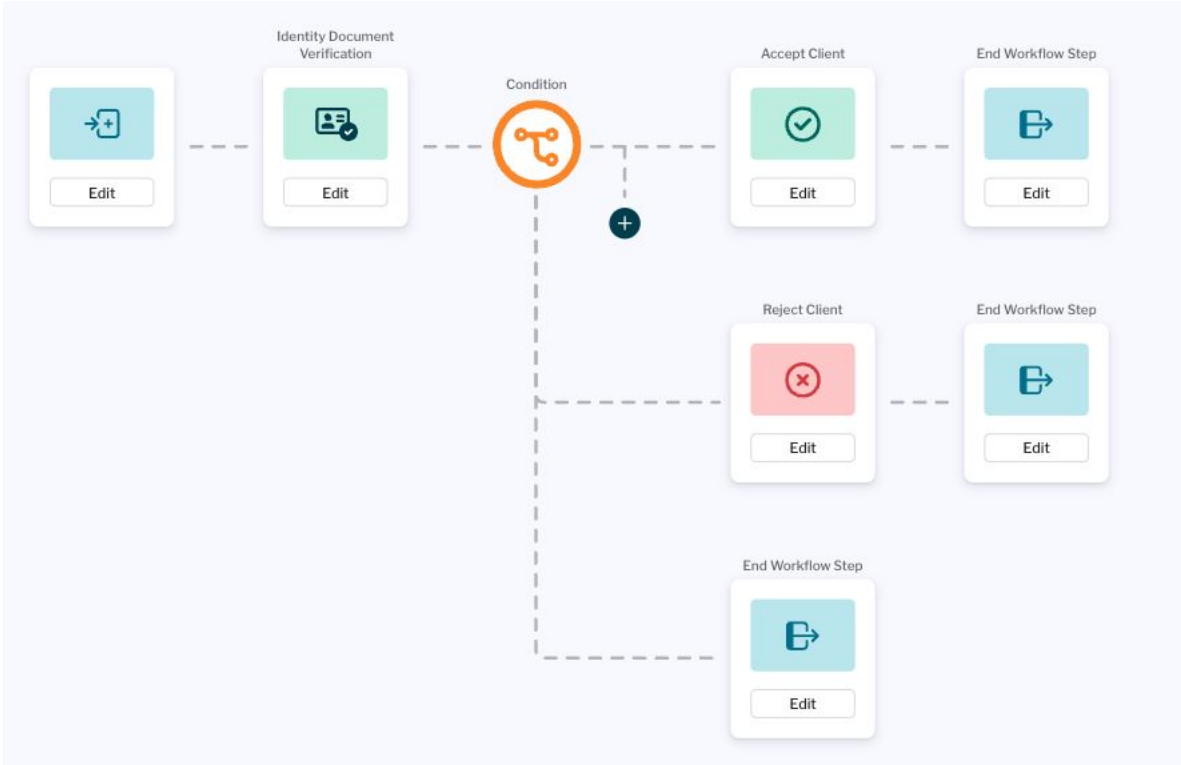

Rapidly build, configure and deploy logic-driven identity workflows in our no-code Workflow Studio.

Workflow examples

Workflow 1:

Identity Document Verification
Condition
Accept Client
End Workflow Step
Edit
Edit

Person Match / Watchlist / ID Document Verification

Workflow Studio live demo

Integration options

Front-end Integration Approach

01

Trulioo Hosted Forms: Link

02

Trulioo Hosted Forms: Embed

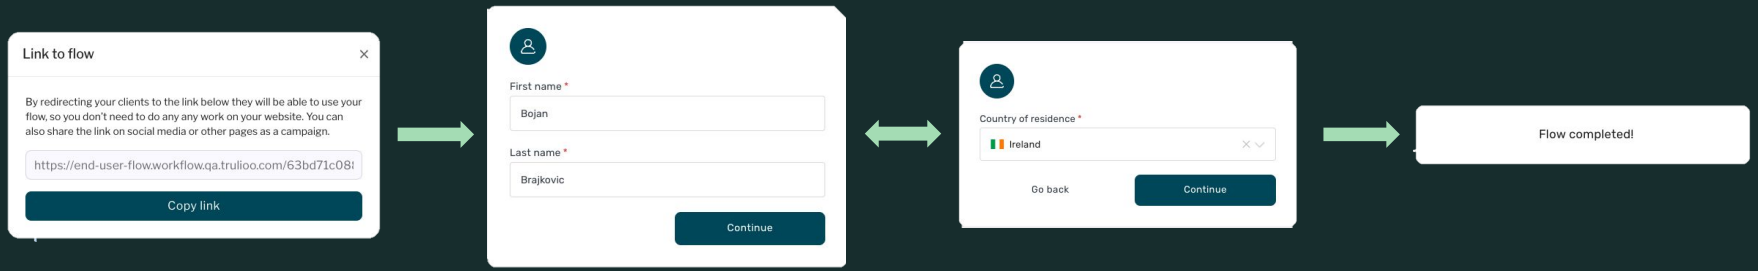

03

API

Trulioo Hosted Forms: Link

01

- Complete solution is hosted on Trulioo servers.
- Once the workflow is published, unique access URL will be generated.
- Unique access URL can be distributed via traditional channels (e-mail, SMS, etc.)

Trulioo Hosted Forms: Embed

02

Basic

Embed the workflow into your website anywhere you want. Only the form will be embedded so you have full control over everything else.

Slider

Embed the workflow into your website by making it slide in from any side when the button on your website is clicked.

Full page

Show the full workflow into your website.

Popover

Embed the workflow into your website by making it show as a popover when someone clicks the button on your website.

Popup

Embed the workflow into your website by making it show as a popup when someone clicks the button on your website.

Side Tab

Embed the workflow into your website by making it slide in from any side. A side button is inserted in your webpage that launches the workflow.

API Integration

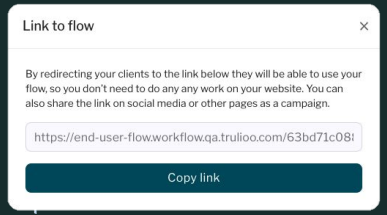

- Utilise Workflow API to dynamically generate sign up form
- No technology dependencies
- No styling limitations
- Control over data collection

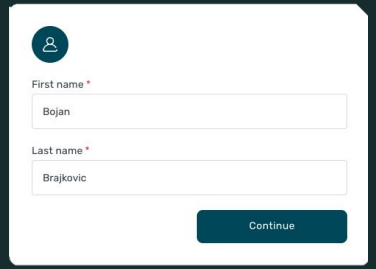

03

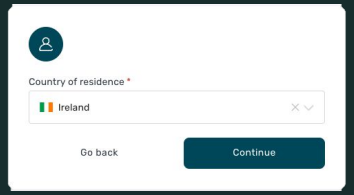

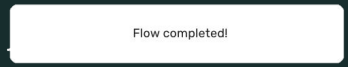

Link/Embed vs API

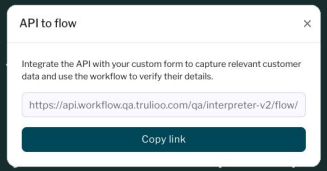

```
{
"canGoBack": false,
"elements": [

Project Plan

Your Journey With Trulioo

A typical onboarding program will likely take 8-12 weeks from start to go-live.

Londonist Journey | Mutual Project Plan

IS

Milestone	Owner	Due Date	Status
Initial Exploration of Partnership (“Deep Dive & Demo”)	Shared	May 2024	Complete
Technical / Legal / Commercials	Shared	May 2024	Complete
Introduction Call	Shared	8th June 2024	Active
Technical Kick-off call	**Trulioo**	24th June 2024	Active
Sharing credentials and postman collection	**Trulioo**		Active
Integrate, Test, Certification	Shared		Pending
Soft Launch?	Londonist		Pending
Go-Live > full volume live transactions	Londonist		Pending

Trulioo

Next Steps

- Set password for Trulioo account
- Make decision on workflow
- Schedule Implementation workshop
- Schedule weekly meeting
