Test embedding instructions

The Unibuddy Platform, and the other traffic drivers (Carousel, Popcard and Buddycard), are embedded using an iframe. The code is provided for each of these within the Unibuddy Admin dashboard, and can be easily copied and pasted into the relevant page on the university website.

Below are instructions for embedding our test platform - these can be used to check that the code works on your specific CSM, but should be deleted as soon as the test is complete.

Main Unibuddy Platform

The main platform acts as a hub page for most call to actions, this means most links in the other features will redirect to this platform.

Example

https://public-demo.unibuddy.com/Demo/widget-demo.html

Instruction

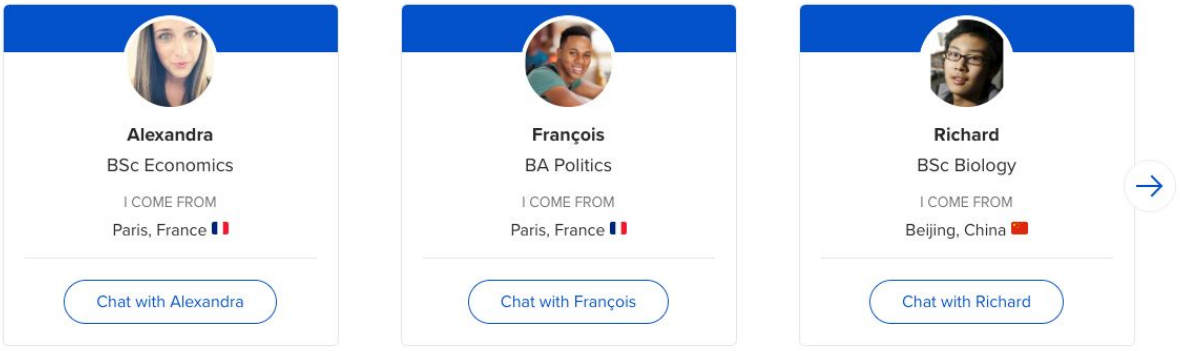

Simply insert the code snippet in the position where you would like it to appear on the page. Copy and paste exactly as shown (do not split the iframe and script by inserting the script in the head section for example).

Code Snippet

```
<iframe id="unibuddy-iframe" scrolling="no"
src="https://unibuddy.co/embed/demo-university/colour/0052CC"
title="Unibuddy" width="100%">
</iframe>
<script src="https://cdn.unibuddy.co/unibuddy-iframe.js"
type="text/javascript">
</script>
```

Unibuddy Carousel

The carousel has been specifically designed to optimise precious space on your homepage. Chatting with students is one of the most important parts of interaction with a university, all the more reason it should be on your homepage.

Example

https://public-demo.unibuddy.com/Demo/popcard-carousel-demo.html

Instruction

Simply insert the code snippet in the position where you would like it to appear on the page. Copy and paste exactly as shown (do not split the iframe and script by inserting the script in the head section for example).

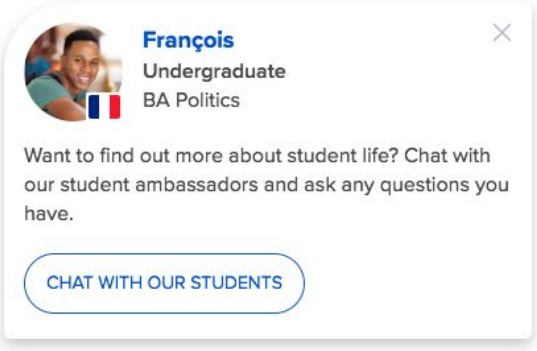

Code Snippet

```
<script>
  window.unibuddySettings = {
    universitySlug: "demo-university",
  };
</script>
<script type="text/javascript"
src="https://cdn.unibuddy.co/unibuddy-carousel.js" async defer></script>
<div data-unibuddy-carousel></div>
```

Unibuddy Popcard

The popcard is a highly successful feature occupying a small static space in the bottom right-hand side corner of the website providing a clear call to action to any visitors. Ideal for homepages/landing pages and open day pages, generally most areas which have the highest prospective student traffic.

Showcase and tailor the most relevant ambassadors to your individual prospects on your targeted webpages to connect more students and increase engagement on your platform.

Example

https://public-demo.unibuddy.com/Demo/popcard-carousel-demo.html

Instruction

Simply insert the code snippet just before the closing body tag </body> on your page.Copy and paste exactly as shown.

Code Snippet

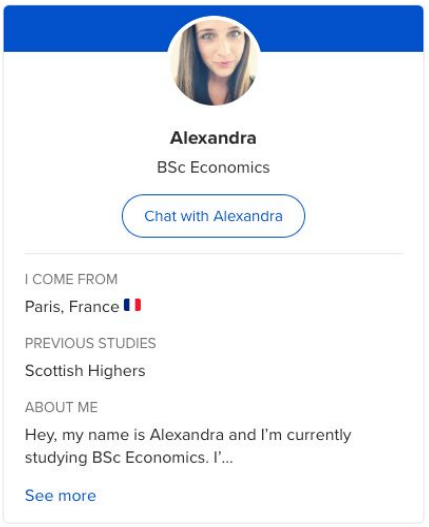

```
<script>
  window.unibuddySettings = {
    uni_id: 'demo-university',
    colour: '0052CC',
    domain: 'https://popcard.unibuddy.co/',
    title: 'Unibuddy Popcard',
    align: 'right',
  };
</script>
<script src="https://cdn.unibuddy.co/unibuddy-popcard.js"
type="text/javascript"></script>
```

Unibuddy Buddy Card

These are small cards that are ideal for course pages, country pages and other areas on your website. They will display all the students that are available on a platform for a specific course or from a country. These are ideal for when you have between 1-4 students from any course or country. Available by:

- Course
- Country
- Individually (On request)

NB - Do not expand - they are designed to occupy a smaller column on a university website.

Example

https://public-demo.unibuddy.com/Demo/university-buddy-cards.html

Instruction

Simply insert the code snippet in the position where you would like the ambassador card(s) to appear on your chosen page. Copy and paste exactly as shown (do not split the iframe and script by inserting the script in the head section for example).

Code Snippet

```
<iframe id="unibuddy-buddyframe" scrolling="no"
src="https://unibuddy.co/demo-university/colour/0052CC/internal/buddies/deg
reeId/59b86b57adea88000409bfaf" title="Internal Buddy Card" width="100%">
</iframe>
<script src="https://cdn.unibuddy.co/unibuddy-buddyframe.js"
type="text/javascript">
</script>
```
