28/02/2024	1.00 * consult 1.00 * urine analysis inhouse (multistix/sg/sediment) O reports last few days has urinated in the house x2 Had diarrhoea yesterday but this settled. Drinks water but unclear if excessive - language barrier with O/us though google translate was helpful. Oscar is BAR, mm pink teeth good with mild tartar only Chest NAd Abdo NAD Neutered male. Unclear why this may have happened at this time Advised urine sample as a precaution. Pot supplied - please run dip/Sg and microscopy. Client had enough to pay for the consult but will pay for the urine test when she brings it in tomorrow, I have explained that client will need to pay when bringing the urine in and has been given a ledger so she knows the outstanding amount Communication: Medivet Terms and Conditions

Date	Clinical History
29/02/2024	O dropped in urine sample please email O with results on: melekerturk23@icloud.com Communication: Lab Template Urine Analysis Report Microscopy revealed marked struvite crystals. I will recommend changing to urinary diet to ensure dissolving of struvite crystals before potential formation of urolithiasis. Emailed results and discussion with owner as above. Communication: Lab Template Urine Analysis Report Communication document: Lab Template Urine Analysis Report from 29/02/2024 Saved as pdf to : \\Client\V$\Downloads\OscarErturk_Urinalysis.pdf "Good afternoon, I hope you are well. Thank you for dropping off Oscar's urine sample today. The most prominent finding is that Oscar's urine is a bit alkaline on the pH, and there's presence of crystals (Struvite crystals) under the microscopy. The crystals is likely the cause of Oscar's strange urination habits as they can cause irritation of the bladder lining. Usually struvite crystals form as a result of an alkaline urine environment, and if not managed well, they can form bladder stones. In Oscar's case, we will recommend switching him to a specific urinary diet to help to change his urine pH and dissolve these crystals. There are a few choices, but we will recommend either Hill's c/d urinary dog food (c/d Multicare Dog Food (hillspet.co.uk) or Royal Canin SO urinary dog food (Urinary SO & UC Dog Food | Royal Canin UK) as prescription diet to dissolve these crystals. If he has no other clinical signs, we advised to start and only give him the same type of food (i.e. no other treats, no other types of food) for 4 weeks, and then we can review his urine sample again to monitor progress. These food can be obtained online, or from us. Please don't hesitate to contact us if you require any other assistance or concerns. I have also attached the urinalysis results for your reference. Best regards, Dr Shun Jing Tan BVMS PgCert(Emerg)WBIS MRCVS Veterinary surgeon"
13/03/2024	client emailed and requested we order the royal canin 4kg dry food urinary s/o, order placed with JC
14/03/2024	1.00 * rcvhn canine small urinary s/o 4kg Communication: Dear Mr Asim Erturk, Oscar's food is ready for collection.
15/03/2024	food collected

Date	Clinical History
17/04/2024	1.00 * urine analysis inhouse (sediment) O bought in urine sample for microscopy to check for crystals as been on urinary food O would like u/s scan of bladder if crytals are still present (O aware may need to go to sidcup if not able to scan here) E-mail owner with results, (melekerturk23@icloud.com) and book in scan and let O know time and where the scan is If urine is crystal free, O would like to book in appt for tues morning for a consult for Oscar's skin O did mention the food Oscar is on makes him constipated, advise to carry on food due to the crystals, O happy with this Please book half hour appts due to language barrer email to owner - *'Good morning.* *The vet has analyzed Oscar's urine, and the good news is there are no more crystals seen. The vet does not feel that Oscar needs an ultrasound scan as the urine is now clear.* *We recommend to keep Oscar on the urinary food to avoid any crystals in the urine coming back. In regards to Oscar's constipation, it would be recommended to add some water to his food. Alternatively there is a urinary wet food that you are able to give alongside the biscuits. I will attach a link for the food. ROYAL CANIN® Canine Urinary S/O Thin Slices in Gravy Adult Wet Dog Foo (pdsapetstore.org.uk)* *I have booked Oscar an appointment on Tuesday at 9am for the vet to check Oscar's skin, also we can discuss this further at your appointment.* *If you have any questions in the meantime, please do not hesitate to get in touch.* *Kind regards,* *Amie* *Student Veterinary Nurse '*
23/04/2024	Weight Recorded: 15.05 kgs 1.00 * consultation post op check 1.00 * by vet **Consult: GHC** hx: -o wants a checkover as he has a small lump on his back which he seems unbothered by and last week he was a bit constipated. o increased his water intake and seems to have resolved. no blood in stools -otherwise bright in himself, DUDE, no v/d/c/s/w cx: all wnl incl TPR. lump on back appears to be a small wart but hard to tell due to small size. plan: -RV if lump on back changes eg grows for FI -made o aware to RV if Oscar has hard stools again, o aware rugent RV required if stool production stops

17/12/2024	Weight Recorded: 15.20 kgs 1.00 * consultation nurse items 1.00 * consultation nurse O came in as wanted to start Oscar on vitamins. Explained this is not neccessary if given a complete diet, and could cause more issues if over supplementing. O gives kibble (bought from V4Ps in Sevenoaks?) and often cooks chicken as extra. O to email food over to check if complete diet. Can start on yumove and explained the benfits as best I could but this was limited due to language barrier. Communication was done through translate app. OR that Oscar had been chewing the daughter's wooden toys at home and seemed uncomfortable since. Looked in mouth and a piece of wood was stuck bewtween the molars on the RHS. Took Oscar out the back and this was removed with forceps
