opsense pro

POWERFUL CONTROL.

SMARTER OPERATIONS MANAGEMENT.

What Opsense Does

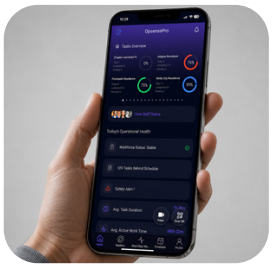

Opsense connects people, tasks and devices in one intelligent platform, giving teams **real-time visibility** and greater control across **day-to-day operations**. From intelligent task assignment and real-time progress tracking to connected devices, performance insights and automated reporting.

Opsense brings every part of on-site operations together in one place. It helps organisations improve **accountability, reduce manual follow-up**, identify issues earlier and make faster, **data-driven decisions** while ensuring teams remain productive, consistent and fully aligned.

REAL-TIME VISIBILITY

Monitor operations as they happen.

MOBILE OPERATIONS

Manage tasks from anywhere.

VERIFIED WORKFLOWS

Turn every acction into accountable data.

Powering On-site Operations with Smart Hardware

From IoT devices to wearable safety tools everything is connected.

Smart Security Wristband

Smart Reader

Smart Beacon

SMART ASSIGNMENT

AI QUALITY SCORING

PREDICTIVE INSIGHTS

Smart task assignment, video based quality scoring and predictive KPI insights, all from the data your teams already generate.

> "We manage a high-volume operation across more than 30 locations. Keeping track of both our teams and the quality of their work was one of the biggest challenges. Monitoring WhatsApp, emails, and CRM systems separately took a lot of time. With Opsense, I can now monitor team performance and track completed or pending tasks in real time from a single dashboard. It saves me a significant amount of time."
